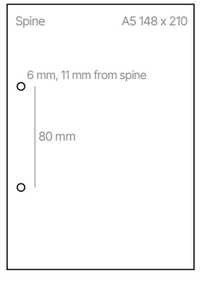
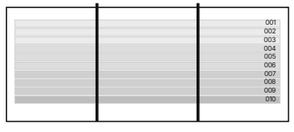
3 Physical system



Case, side view (10 volumes on 2 pins)



Acrylic case, 2 steel pins. Est. 6.7 mm per volume (35 opaque leaves at 0.14 mm, 13 vellum at 0.09 mm, covers 0.3 mm), about 67 mm for all 10. Confirm with paper samples.

Binding: digital print + perfect bind works as is (every section starts on a recto, even counts). For sewn offset, set 02 to 12 pp and 03 to 8 pp, then gather by stock.

- Binding method: perfect bind vs. sewn signatures
- Case lists for volumes 002-010 (6 each)
- Final formula strings for volumes 002-010

Vol. 010 Machine closes the series and ties back to Lathe (Prototype I): the newest hierarchy, and the first that inverts seniority.
